Real-Time Area Stats Available Online

The city of Las Vegas **Economic and Urban Development Department** (EUD) is now providing the public with real-time data for key economic, fiscal and demographic data within the city, Clark County and the Las Vegas Metropolitan Statistical Area (MSA). The city of Las Vegas is the first municipality in the state of Nevada to make use of this data tracking and real-time reporting service.

This new information portal utilizes data housed by **MyResearcher.com**, an online repository created by local research firm Applied Analysis. Thousands of up-to-date economic and fiscal metrics are kept current within this repository for easy access and analysis.

Featured on EUD's data portal will be the most requested local economic statistics, which include a constantly updated compilation of the local office, industrial and retail markets.

This information service eliminates the need for many monthly, quarterly or annual reports, which often have long lead times and can quickly become outdated.

The data portal contains current information from thousands of sources, which should help viewers reduce time spent collecting data from multiple locations.

Keep current on area facts and demographics using the new online data portal. (Photo by Studio West Photography)

A similar service was also recently developed for the Nevada Governor's Office on Economic Development.

To view the city's new facts and demographics data portal, please visit **www.lvrda.org**. Click on the blue "Facts & Demographics" button in the site's upper right-hand corner.

For additional information on the MyResearcher function, please visit **www.myresearcher.com**.
